RE: Clarification #10 for Measurement Year (MY) 2022 Updates

Dear Colleague,

This letter contains information about edits incorporated into the 2022 Quality Assurance Reporting Requirements (QARR) Technical Specifications for Measurement Year (MY) 2022 reporting. The updated file is posted on our Managed Care [Information for Health Plans](#) page. The revised specifications should be used in plans' processing for MY2022 QARR.

This clarification includes the following changes made to the 2022 QARR Technical Specifications Manual.

Change Version	Version Date	Section(s) Changed	Change Summary
10	1.4.2023	<b>QARR Technical Specifications</b>	Adult CAHPS 5.1H is required to be reported for Essential Plans. Details about submission can be found in the submission requirements on page 5 and page 8. Table 1 in the QARR Technical Specifications inadvertently had this notated as not reported (NR). This has been corrected to a checkmark.

If there are any questions about the above edits, or if you find issues or have concerns with the 2022 Technical Specifications manual or other documents, please email [nysqarr@health.ny.gov](mailto:nysqarr@health.ny.gov).

Sincerely,

Paloma Luisi, MPH  
Director, Bureau of Quality Measurement & Evaluation
